Technology Makes *the* Difference

It's important to understand how new technologies can help you stay ahead of the curve when it comes to regulatory compliance.

Better Business With CE

Controlled Efficiencies, LLC (CE) offers innovative solutions that simplify the intricacies of compliance, specifically designed for government-regulated industries. Leveraging our proprietary system, we provide secure technologies that scale with your business, improve employee productivity and boost your bottom line while keeping you compliant.

Our leadership has roots in compliance-driven industries and collectively brings 40+ years of experience dealing with the FDA, DOT and the Board of Pharmacy for several states.

The founders of CE also own a medical gas manufacturing and cylinder recertification company. Compliance was one of the largest liabilities and stresses for this company. In 2009, we began developing and testing a technology program to resolve these concerns. After seven years of mastering this robust program, CE is now offering **CERES** (CErtifi™ Electronic Records Electronic Signature) to the marketplace for businesses in need of a better compliance solution.

Designed by medical gas business owners for medical gas business owners, CERES offers a comprehensive process control software that has been validated and passed FDA audits for compliance with no findings.

It's compliance made simple.

Compliance **Made Simple**

- Advanced notifications and countdown clock for ease of tracking and scheduling critical training dates
- Biometrics provide precise data on employee identification and activity
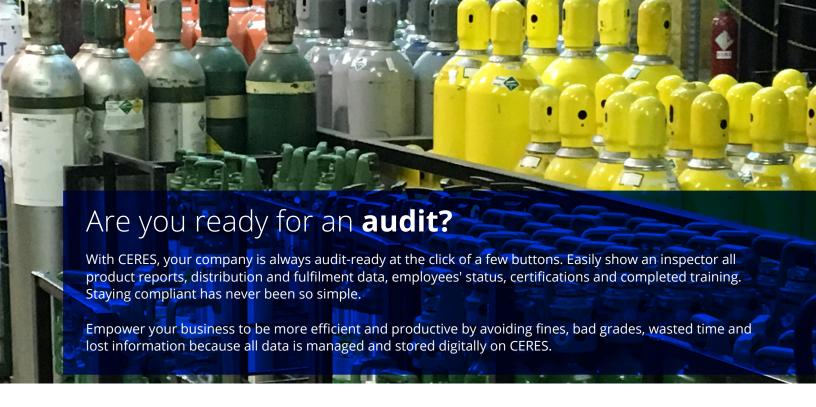

Secure, **Flexible & Efficient**

- Versatile platform available to meet the needs of your organization, regardless of size
- Accurate historical data is readily accessible to view, share or export at the click of a button

Performance **Driven**

- Eliminate the stress and labor-intensive paper trail of documenting the production process while reducing human error by entering data once, then letting the system manage
- At-a-glance reporting provides a real-time view of your organization's status, whether single or multiple locations, saving you time and money

Are you ready for an **audit?**

With CERES, your company is always audit-ready at the click of a few buttons. Easily show an inspector all product reports, distribution and fulfilment data, employees' status, certifications and completed training. Staying compliant has never been so simple.

Empower your business to be more efficient and productive by avoiding fines, bad grades, wasted time and lost information because all data is managed and stored digitally on CERES.

CERES

Using biometric fingerprint technology for authentication, CERES features a built-in training and testing module that will prevent an employee with expired training from authorizing a process requiring certification.

Simplified workflow enables:

- Automated, user-friendly lot number creation and tracking

- Seamless process and built-in validation for pre-fill inspection, filling and post-fill

- Automated alerts sent to supervisors and QCU for required e-signatures

- Best practice industry SOPs

- Cylinder maintenance including quarantine processes

- Automated distribution and delivery ticket preparation

- Instant (and mock) recalls for testing or in the event of an issue (with restricted approvals)

Management features include:

- Production, testing, calibration, maintenance and inspection records

- Personnel qualification and employee notifications

- Biometric time management system, if desired
